

Phase-2: Greek God Physique Workout Plan

Role: Professional Strength & Physique Training Phase

Duration: 4–6 Weeks

Training Frequency: 5 Days + 1 Skill/Recovery Day

Session Length: 70–80 Minutes

Medical Status: Neurologist cleared, seizure controlled, medication tapering ongoing

Phase-2 Objectives

- Build **visible abs** (upper, lower, obliques)
- Increase **shoulder width & V-taper**
- Add **arm density** (biceps, triceps, forearms)
- Strengthen **glutes, calves, hips, traps** for waist-to-shoulder illusion
- Maintain CNS safety while training hard

This phase prioritizes **muscle density + aesthetics**, not scale weight loss.

Mandatory Daily Warm-Up (10 Minutes)

(Research-backed core activation & joint prep)

1. Incline walk / cycle – 5 min
 2. Cat-Camel – 10 reps
 3. Hip-flexor stretch – 30s / side
 4. Dead bug – 10 / side
 5. Glute bridge – 15 reps
 6. Scapular wall slides – 12 reps

 - Upper abs visible
 - Lower belly flatter
 - Arms denser & rounder
 - Back thicker, legs stronger
-

Safety & Recovery Notes

- Hot shower **20–30 min after workout**, not immediately
 - Hydration + electrolytes mandatory
 - If sleep quality drops → reduce boxing intensity, not lifting volume
-

Key Rule of Phase-2

Train hard, recover harder. Consistency beats intensity spikes.
