

TUSHAR SHARMA

DevOps Engineering | Cloud Infrastructure | CI/CD Automation

Seeking a senior-level role in DevOps, Cloud Engineering, and Infrastructure Automation, leveraging expertise in CI/CD, Azure, Kubernetes, and end-to-end solutioning to drive scalable technology delivery.

+ 91 9999924079

tusharvasshishth@gmail.com

Profile Summary

- Results-oriented DevOps Leader** with over **7 years of experience** delivering **end-to-end cloud and DevOps solutions**, from infrastructure provisioning to deployment and monitoring, across **Azure environments**.
- Specialized in architecting CI/CD pipelines** using **Azure DevOps** and **GitLab**, improving software delivery speed, reliability, and quality through streamlined automation and container orchestration.
- Designed and deployed reusable infrastructure templates** using **Terraform**, **Bicep**, and **ARM templates**, enabling scalable, repeatable environments and reducing provisioning time by up to **30%**.
- Led microservices-based architecture initiatives**, implementing **Docker** and **Kubernetes** to ensure efficient API communication, seamless deployments, and a **25% decrease in deployment issues**.
- Automated operational workflows** through **PowerShell**, **Python**, and Azure services such as Logic Apps, enhancing daily task efficiency and eliminating repetitive manual efforts.
- Implemented monitoring and performance optimization** using tools like **Dynatrace** and **JMeter**, identifying bottlenecks & boosting system responsiveness.
- Delivered complex migrations** of on-premise SQL databases to **Azure SQL**, ensuring minimal downtime & achieving improved database scalability and resilience.
- Drove complete end-to-end solutioning**, handling everything from technical design to implementation, ensuring delivery of scalable, secure, and production-ready environments.
- Actively mentored junior engineers**, conducted knowledge-sharing sessions, and fostered a collaborative DevOps culture, leading to measurable improvements in team efficiency and delivery standards.

Technical Skills

Infrastructure as Code	Terraform, BICEP, ARM Templates
Cloud Platforms	Microsoft Azure
CI/CD Tools	Azure DevOps, VSTS (Visual Studio Team Services)
Scripting Languages	PowerShell, Python
Containerization & Orchestration	Docker, Kubernetes
GitOps Tools:	Argo CD
Performance Testing	Locust
Automation & Monitoring	Logic Apps
Networking	Azure VNet, Subnets, VNet Peering, Application Gateway
Databases	SQL Server (On-prem & Azure) – development, administration, and migration
Azure Data Management	PySpark, Azure Data Factory, Azure Synapse, Azure Storage (Blob/Table), Data Lake
Version Control	Git (contextual from DevOps practices)
API Management	API Integration, API-based configuration & automation

Career Timeline

Core Competencies

- DevOps Strategy & Execution
- Cloud Infrastructure Design & Management
- CI/CD Pipeline Development & Automation
- End-to-End Solutioning & Delivery
- Infrastructure as Code (Terraform & BICEP)
- Containerization & Orchestration
- Microservices Architecture & API Integration
- Monitoring, Logging & Observability
- Release Management & Deployment Planning
- Cloud Migration & Modernization
- Automation Scripting & Workflow Optimization
- Security Compliance & Governance
- Cost Optimization & Resource Efficiency
- Technical Leadership & Cross-Functional Collaboration
- Agile Methodology & Iterative Delivery

Education & Credentials

- Master of Computer Applications (MCA)**
Vellore Institute of Technology (VIT), Vellore | 2016 – 2018
- Bachelor of Computer Applications (BCA)**
DAV Institute of Management (DAVIM), Faridabad | 2013 – 2016

Certifications

- Certified Kubernetes Application Developer (CKAD)** – CNCF
- Microsoft Certified: Azure Administrator Associate (AZ-104)** – Microsoft
- Microsoft Certified: Azure AI Fundamentals (AI-900)** – Microsoft

Work Experience

➤ Tech Lead | Altudo Consultancy Services | Nov'24 – Present

- **Client Requirement Analysis:** Collaborating directly with enterprise clients to gather DevOps, cloud infrastructure, and automation requirements, and translating them into scalable and secure technical solutions.
- **Solution Design & Estimation:** Designing high-level solution architectures and preparing effort estimations for infrastructure automation, CI/CD, and container orchestration in both pre-sales and delivery phases.
- **Cloud Cost Optimization:** Performing periodic audits and performance reviews of Azure cloud environments, identifying cost inefficiencies, and implementing savings plans and reserved instances.
- **DevSecOps Integration:** Integrating static code analysis, security scanning, and policy-as-code practices into CI/CD pipelines to ensure security compliance across deployment workflows.
- **Python Automation & Data Handling:** Leveraging Python scripting to automate cloud operations, configuration management, and data processing tasks, improving system efficiency and deployment accuracy.
- **Database Management:** Supporting SQL Server administration and Azure-based database automation, including backup scripting, performance monitoring, and migration activities.

➤ Technology Lead | ValueLabs | Apr'24 – Nov'24

- **Role Scope:** Led initiatives across coding, infrastructure management, integration, deployment, and security, contributing to the efficiency and reliability of the software delivery pipeline.
- **Infrastructure Automation:** Implemented infrastructure and automation solutions that supported scalable application deployment and streamlined DevOps workflows.
- **Data Optimization:** Enhanced data handling processes by optimizing the collection, storage, and processing layers, aligning with performance and compliance standards.
- **Database Management & Optimization:** Supported SQL Server operations, including query optimization, backup automation, and integration of on-prem and Azure SQL databases into cloud pipelines, improving data reliability and access performance.
- **Cross-Functional Collaboration:** Facilitated collaboration between cross-functional teams to ensure smooth integration and delivery of services in a cloud-native environment.
- **CI/CD Improvements:** Strengthened deployment reliability by refining CI/CD practices and improving environment stability.

➤ Senior DevOps Engineer | HUB Pvt. Ltd. | Jul'23 – Apr'24

- **Infrastructure Provisioning:** Developed scalable infrastructure using Terraform and BICEP, reducing deployment time by 30%.
- **Automation Development:** Automated recurring tasks with PowerShell and Python, increasing operational efficiency & minimizing manual effort.
- **Microservices Integration:** Orchestrated a microservices-based architecture to enable seamless API communication & improve system cohesion.
- **Containerization & Deployment:** Deployed APIs in Docker containers & managed them via Kubernetes, reducing deployment errors by 25%.
- **CI/CD Pipeline Setup:** Built end-to-end CI/CD pipelines in Azure DevOps, accelerating delivery cycles and improving deployment reliability.
- **Traffic Routing Optimization:** Configured path-based routing in Azure Application Gateway, enhancing traffic flow & application responsiveness.
- **Cloud Network Configuration:** Designed and implemented Azure subnets and VNet peering to ensure secure, scalable, and high-performance networks.
- **Database Migration:** Led migration of on-prem SQL Server databases to Microsoft Azure with minimal downtime & improved database scalability.

➤ DevOps Engineer | Adani Digital Labs Pvt. Ltd. | Mar'22 – Jun'23

- **Accelerated Release Cycles:** Built and maintained end-to-end CI/CD pipelines in Azure DevOps, which shortened release timelines by 25% and ensured consistent deployment quality.
- **Strengthened System Performance:** Embedded JMeter into Azure VSTS pipelines to run automated performance tests, enabling early detection of bottlenecks and enhancing response times.
- **Reduced Infrastructure Overhead:** Deployed builds via Microsoft self-hosted agents, which minimized dependency on external environments and improved provisioning speed.
- **Modernized Application Infrastructure:** Structured a containerized microservices environment using Docker and Kubernetes, enabling dynamic scaling and smoother application lifecycle management.
- **Enhanced Team Capability:** Delivered technical workshops and mentoring to junior engineers, fostering hands-on learning and elevating team productivity by 20%.

➤ CloudOps Engineer | Condeco Software Pvt. Ltd. | Jul'18 – Mar'22

- **Production Deployment:** Orchestrated VSTS release pipelines to deploy production environments, accelerating delivery timelines and ensuring stable, error-free releases.
- **Task Automation:** Engineered automation for daily operations and two enterprise components using PowerShell, ARM templates, Logic Apps, and Azure resources, enhancing process efficiency.
- **System Optimization:** Utilized APIs and SQL queries to retrieve application states and modify configurations, resulting in a 15% improvement in system responsiveness.
